

Software Developers – London –permanent and fixed term roles

Technologies: .NET v.4.0; C#; ASP.NET MVC Framework;

THE COMPANY

The Parliamentary Digital Service is a joint department of both Houses and is responsible for the strategy, delivery and management of Parliament's digital platforms. We are looking to build our digital capability and recruit talented, enthusiastic and passionate people, who will play a part in enhancing our democracy. Over the last year we have consulted widely with people across the country to think about how technology can enrich and improve our democracy. In the coming year we will be pushing forward with many of these recommendations and need talented people to help us do that and help Parliament to become a digital by default organisation.

THE ROLES

Q10331 Developer x 1

2 years fixed term contract with the possibility of extension or permanency

Many of the outputs that the Parliamentary Digital Service produces are reports, publications and data. A new team has been created to support publications-related work and products and to take care of the end to end process.

From smaller systems to larger complex systems the Software Developer will help specify, design and develop a range of in house publishing systems taking responsibility for design, coding and documentation. As a Developer you will ensure all work carried out is well documented using appropriate standards, methods and tools.

We are looking for someone who is proficient in in.NET and C# with Agile Development Process experience. We are also looking for people who have an in depth knowledge of Word Development using VBA and add-ins as many of our applications use Word as editorial tool. You must have an analytical approach to problem solving and the ability to communicate with technical and non-technical staff at all levels.

For more information and job description please visit www.parliament.uk/jobs

YOUR SKILLS AND EXPERIENCE

We are currently looking for a Software Developer who has:

- Experience to proficient level in .NET v.4.0 C#
- Very Knowledgeable in XML and XSLT
- Word Development using add-ins using VSTO
- Effective team working skills to ensure constructive use of everyone's skills and experience within the team
- A systematic and analytical approach to problem solving.
- Agile Development Process experience, ideally SCRUM

DESIRABLE

Optionally looking for a Software Developer who has:

- Experience in publishing including tools such as Design and Mark Logic
- Web Development Skills

Q10332 Developers x 3

Permanent

As a Software Developer you will help specify, design and develop a range of systems taking responsibility for the design, coding and documentation. As a Developer you will ensure all work carried out is well documented using appropriate standards, methods and tools. You will experience an array of technologies, from the relatively simple business process application to highly complex lightly coupled SOA architectures, API platforms, and the Semantic web.

We are looking dynamic and motivated developer with an agile development process background. Being proficient in C# .Net you must have an analytical approach to problem solving for both new and existing projects and be able to build relationships and work very closely with our customers.

Examples of some the work we do can be found at <http://www.digiminster.com/> and <http://www.data.parliament.uk/>

For more information and the job description please visit www.parliament.uk/jobs

YOUR SKILLS AND EXPERIENCES

We are currently looking for a Software Developer who has:

- 3+ years' experience using .NET v.4.0 or above with C#
- 2+ years' experience using ASP.NET MVC Framework
- Effective team working skills to ensure constructive use of everyone's skills and experience within the team
- Agile Development Process experience, ideally scrum using TDD.
- The ability to work across the Full software development lifecycle

Q10334 Developer x1

Permanent

We want to expand our team of outstanding Software Developers to help the Digital Service build, run and maintain great Digital Services for both Houses and the public. Candidates must have strong skills in front end development. You will help specify, design and develop a range of systems taking responsibility for the design, coding and documentation.

We are looking for a dynamic and motivated developer with an agile development process background. Being proficient in JavaScript (including jQuery) Sass and Bootstrap you must have an analytical approach to problem solving for both new and existing projects and be able to build relationships and work very closely with our customers.

YOUR SKILLS AND EXPERIENCES

We are currently looking for a Software Developer who has:

- Front-end experience, developing websites as your main role, proficient in using JavaScript (including jQuery) Sass and Bootstrap
- Experience of responsive web design
- Knowledge of working within a .Net environment
- Experience of working within corporate environments
- Ability to communicate technical concepts to non-technical audience
- Analytical approach to problem solving

DESIRABLE

- Some experience of AngularJS

SALARY AND BENEFITS

Salary Band B1 (£36,500 – £42,825)

We offer a comprehensive benefits package including:

- excellent learning and development opportunities
- generous annual leave,
- contributory pension scheme,
- childcare voucher scheme, on site nursery,
- season ticket/bicycle loans,
- in house gym

We encourage work-life balance and working hours can be flexible to suit individual needs.

HOW TO APPLY

Please ensure that you send your CV with a covering letter with a sample of some code that you have written. Your CV should demonstrate broadly how you meet the criteria in the job description. Your covering letter must specifically address the areas listed above. Your application will not be considered if all three of these requirements are not completed. You may provide a link to your GitHub profile in lieu of a code sample if preferred

Please ensure that you clearly indicate the role(s) that you are applying for.
